A content partnership for Implant + Perio Clinic

Prepared for Dr Sanaz Tehrani | September 2026

1 The gap, and why it matters now

Implant + Perio Clinic is an established specialist practice in the Harley Street district with 150 five-star reviews. Online, it barely exists. The Instagram account has 213 followers, and the website does not link to it.

That gap matters more than it did two years ago. Patients look a practice up before they trust it, and increasingly they ask an AI rather than a search engine. The names that come back are the practices with a visible, consistent presence and a clear point of view. Reputation used to travel by referral. Now it travels through what can be found, and a brand that can be found holds more value than one that cannot, to patients and to anyone else who looks at it closely.

You told us you are happy with the patients you have and want to change how they find you: directly, rather than through referral and the cost that comes with it. That is the right priority, and January is the right time to start it.

2 The camera problem, solved

The obstacle is a familiar one. The people who should be on camera, the clinicians, would rather not be. That is entirely reasonable, and it has stopped a great many excellent practices from ever starting.

We build a realistic AI avatar of each principal: your likeness and your voice, created in a single studio session at the clinic. From then on, every reel, every explainer, every short piece of patient education is presented by you, in your voice, without you standing in front of a camera again.

We write and produce everything. You approve every word.

3 How each week works

Monday	We draft the week's scripts from the editorial plan, in your voice, on your treatments.
Tuesday	You approve, amend or decline each one. Every piece is produced only after your written sign-off.
Wednesday to Thursday	We produce the reels, captions and stills, matched to the clinic's visual identity.
Friday to Sunday	Content publishes on schedule. We handle comments and enquiries, and escalate anything clinical to your team.

You see it before your patients do. Every time.

4 Two ways to work together

OPTION ONE Core <i>The clinic present every week, consistently, in its own voice.</i> ● 2 AI avatar reels per week (8 per month) ● 1 further post per week: carousel, photograph or educational still, making 12 posts per month ● 3 stories per week ● Instagram managed end to end: captions, scheduling, comment and enquiry triage ● Quarterly photography session at the clinic (half day) ● Monthly performance report ● Named account manager, same-business-day response £1,490 per month	OPTION TWO Complete <i>The full engine: enough volume to lead the specialist conversation in London, with website assets to match.</i> ● 4 AI avatar reels per week (16 per month) ● 2 further posts per week, making 24 posts per month ● Daily stories ● Instagram and Facebook managed end to end ● Monthly photography session at the clinic (half day), including consented patient-journey work ● One avatar-led explainer video per month for the website: implants, periodontics, Invisalign, rotating through your treatments ● Monthly strategy call and report, quarterly review ● Dedicated account manager £2,490 per month
---	--

Both options run month to month, with 30 days' notice either way.

5 Avatar Studio Setup

Before the first reel, we build the foundation. This is a one-off piece of work, priced separately from the monthly service.

- **Studio session at the clinic:** avatar capture and voice capture for Dr Tehrani and Dr Negahban
- **Likeness and voice agreement,** so you hold full control over how your avatar is used
- **Visual identity for video:** lower-thirds, end cards, caption style, colour grade matched to the clinic's palette
- **Content pillars and a 90-day editorial plan** across implants, periodontics, Invisalign, whitening, patient journey, team and clinic
- **Foundation photography session:** clinic, team, treatment rooms and hero images for the website
- **Instagram profile rebuild:** bio, highlights, link and grid strategy

Avatar Studio Setup	£1,950
Third clinician avatar (Dr Tinti)	£450

6 Investment

	Option One · Core	Option Two · Complete
Monthly	£1,490	£2,490
Avatar Studio Setup (one-off)	£1,950	£1,950
Term	Month to month, 30 days' notice	Month to month, 30 days' notice

Studio Setup is invoiced on agreement and secures your January start. The first monthly invoice falls on 1 January 2027.

7 Timeline to January

You told us January is when you want to begin. Working back from that:

On agreement	Studio Setup confirmed. January secured.
November	Studio session at the clinic. Avatars built. Photography session. Editorial plan agreed.
December	Instagram profile rebuilt. First month of content produced and approved ahead of time.
1 January 2027	Live, at full pace from week one.

8 Standards

Dental advertising in the UK sits under GDC guidance and the CAP Code, and content carrying a clinician's likeness deserves particular care. Every script is approved in writing by the named clinician before production. Every claim is accurate and specific to your practice. Patient imagery is used only with documented consent. Content is AI-produced and human-reviewed, always.

9 The next step

Choose the option that fits. We send the agreement the same day, confirm the November studio date, and January opens with the clinic present, in its own voice, every week.
